

WASTE

- Overview
- Manure
- Agricultural
- Industrial
- Food Processing
- Municipal
- Chemical, Toxic or Difficult Wastes
- **Solid Wastes**

Over the years we have consulted on numerous solid waste projects and designed a number of solid waste treatment systems. Waste Solutions can offer skills across a wide range of disciplines.

Our experience is also supplemented by the fact that we are part of, and can source expertise from our parent company, Duffill Watts. Through their 60 year history and 650 staff working across a wide range of disciplines they have, in the past, acted as asset managers, financial planners and solid waste engineers on behalf of a number of local and government clients.

Solid wastes should be treated in an environmentally responsible way as it often contains contaminants. Please contact us for information on how we can help you analyse and develop treatment options for your waste.
